

## PC Doc Online Backup System

Backup any data, anytime, anywhere.

### PC Doc Online Backup™ with LiveProtect. Backup any data, any time, to any destination

PC Doc gives you the flexibility and power to create a backup that will meet your need. Backup your MS Outlook daily to 6 global datacenters. Backup your entire computer to a USB drive nightly or backup My Documents to your iPod each hour or engage LiveProtect to have PC Doc watch your files and provide continuous real-time data protection. You save it – we back it up offsite invisibly and automatically, keeping an unlimited version history that lets you roll-back to any point in time

PC Doc provides Big-Business IT best-practice for the little guy – true multi-destination, multi-schedule backup that can be adapted to meet your needs but at consumer price. PC Doc is software as a service billed at a low monthly subscription. A basic annual subscription costs less than most stand-alone backup software packages – let alone a tape-drive or an external hard-drive.

### Local Backup

Online backup is invaluable but simply cannot protect your entire computer. Using PC Doc local backup system, you can backup your entire computer, open/locked files and operating system files to any local medium, whether it is an external USB drive, a local network location, a USB stick or an iPod.

### Unlimited Number of Computers

Backup as many computers as you like using one account. Over 60% of households have more than one computer, and PC Doc allows you to backup and recover from all of your machines. Backup your home, office and laptop computers all on one account for easy access to ALL your files from anywhere.

# PC Doc

## ONLINE BACKUP

### Unlimited Versions & Powerful Recovery

Keep an unlimited version history of all your files – roll back your books to last year's tax records if you wish. Use our time machine feature to go back to the date you want to restore and recover that snapshot of files & versions.

### Fully Flexible Scheduling

Monthly, weekly, daily, hourly or instant backup.

### LiveProtect™

Engage PC Doc LiveProtect™ to have PC Doc back up files as soon as a change is detected.

### Intelligent File Filters

Tell PC Doc Online Backup to watch your My Documents folder but to ignore all \*.mp3's and \*.avi's. Alternatively, tell PC Doc to only protect \*.doc, and \*.xls. Either use our pre-sets, or set your own inclusion/exclusion mask.

### Enterprise Compression & Transfer Systems

The PC Doc compression system only backs up changed files and then only the changed 1's and 0's are transferred. On a 500 MB database (MYOB/Intuit/Turbo Tax) the daily transfer can be as small as 5 KB. Our transfer system is enterprise grade, meaning that large file transfers are resumed at the KB of interruption, and does not start at the beginning like most online backup systems.

### Global Roaming Access to Your Files

Because your data is being backed up daily to the PC Doc Backup Server Grid - you can access your data anywhere in the world using just a web-browser. Never be without that critical file again.

### One-Click File & Folder Sharing

From inside the Online Recovery Interface you can share your files with anyone to an email address. Never have a large attachment bounce again. Just share your backed-up data with your friends and colleagues. Or if you are a some user – simply share photos or videos.

### Archiving

Unlike other online backup systems, we do not delete the file from your backup just because you delete the file from your computer. Over 80% of data loss occurs due to accidental deletion. Rest assured, we keep every version of every file forever. Unless you choose to remove it.

### Pricing

Pricing is in gigabytes. Standard pricing is \$18 per GB. Please ask about bulk pricing.
